#### a) Accounting Policies

These financial statements are prepared on the accrual basis of accounting in conformity with accounting principles generally accepted in the United States of America; consequently, revenue is recognized when services are rendered and expenses reflected when costs are incurred.

#### b) Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and use assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. These estimates are often based on judgments, probabilities and assumptions that management believes are reasonable but that are inherently uncertain and unpredictable. As a result, actual result could differ from those estimates.

Management periodically evaluates estimates used in the preparation of the financial statements for continued reasonableness. Appropriate adjustment, if any, to the estimates used are made prospectively based on such periodic evaluations.
